Headteacher: Ms J Rutherford BA (Hons)

Dear Parents and Carers,

Following a review of our systems for collecting and sharing information with parents and carers, we have decided to implement GO 4 Schools at King Edward VI School.

GO 4 Schools (G4S) is a 'real time' online school data system which has the functionality to give parents and students access to:

- Attainment information – Including target and predicted grades for individual subjects
- Timetable – Your child's daily and weekly timetable and the names of their teachers
- Attendance – Attendance marks and overall attendance figures
- Progress Reports – Reports are published throughout the year
- Conduct – View details of achievement points, behaviour events and any detentions set

This is a web based system which also has a downloadable app to enable you to receive notifications and access up to date information quickly and easily. We will be launching this in two phases and anticipate that the first phase will go live after the Easter holiday. This will include the conduct and attendance modules. In the meantime we will still publish reports via our Switch platform.

We will launch the remaining modules (attainment information, reports and timetable information) from September 2022.

Before the Easter break we will contact you to share further information and provide passwords so that you can log on to the system. At this point we have no plans to move away from SMHW which will remain as our method of communicating work set outside of face to face lessons.

Yours sincerely

Mrs L Hurn

Deputy Headteacher
